

# A REVOLUTIONARY OPEN SCIENCE PLATFORM!

Therapoid is an open science platform that provides students and researchers with free tools, services, intellectual properties, and awards ScienceCoins cryptocurrency for collaborating and advancing knowledge.

## COLLABORATION + AWARDS

Most of the research field have at least an interdisciplinary impact on human, plant, animal, and planetary health. We seek to bring all scientists, clinicians, citizen scientists, public, and students together to positively impact research, particularly in economically developing countries.

Therapoid freely offers grants, discussion forums, equipment, intellectual properties, preprint server, career opportunities, and ScienceCoins cryptocurrency awards to help you create positive health and environmental outcomes around the world.

ScienceCoins cryptocurrency awards will be especially helpful to those economically challenged students and researchers who collaborate. On cryptocurrency exchanges, ScienceCoins can be converted into local fiat to purchase books, journal subscriptions, consumables, and even to a colleague for translating your papers. Basically, ScienceCoins give you a big reason to join the open science movement!

The question is not 'why should I join the world's biggest think-tank?', but rather, 'why would I not join?'.

## THE MISSION

The Therapoid collaborative environment works to create positive health outcomes by lowering research and development (R&D) costs and reducing risks.

The development of COVID19 treatments and vaccines are superb examples of outcomes that can be driven by open science.

Therapoid enables you to be recognized by governments, companies, institutions, not-for-profits, colleagues, and even the public. Getting noticed leads to speaking engagement, employment, consulting, and promotion opportunities.

Therapoid provides economically challenged researchers and students with a collaboration platform that awards sharing and communicating.

Therapoid is freely available to all researchers and students. All scientific fields can promote health outcomes through interdisciplinary efforts. Fields ranging from anthropology to zoology can impact global health outcomes and should have the opportunity to collaborate. You likely know how your field impacts human health.

## WHY COLLABORATE WITH THERAPOID?

**ScienceCoins Cryptocurrency Awards When You:**

Launch or join research groups.

Post drafts and papers for peer review in a simplified preprint server; dissertations allowed.

Request or offer free equipment.

Apply for grants. You can even recycle highly reviewed, but unfunded applications.

Encourage your colleagues to join.

Discuss policy, funding, research, patents, copyrights, news, and current events

Several other free features that award ScienceCoins will roll out over the next few months so **stay tuned!**

Everything within the free Therapoid platform is only available under a Creative Commons 4.0 ShareAlike license, which makes all the material within Therapoid free to the world. See the Terms of Service (TOS) for more information.
